
COMBAT:

Turns:

The basic mechanics of an ECOUNTER are split between ACTING and BATTLING phases.

When ACTINGS the attacking party always moves first, each member can do 1 ACTion per turn, downed party member have their action skipped and instead recover health. The Party can also freely adjusts the Formation by one member every turn.

Enemies use their turns to attack the SOUL on the Bullet Board, some enemies however can instead use SKILLS or even ITEMS during their Turn.

Party Actions:

Party Characters have a loadout of 4 different Actions they can use depending on their Class:

FIGHT - A free basic attack move, Fight actions include a minigame (based on weapon equipped) to calculate DMG dealt scales from AT.

HEAL - A free basic heal that can be

used on both Teammates and Enemies (Healing is converted to Damage). Includes a minigame (based on weapon equipped) to calculate the amount Healed. Healing scales from MG stat.

SKILL/SPELL - Any and All other Skills and Spells are under the SKILL Tab. Skills always cost 1-3 TP and can range from buffs, shields, heals and other effects. ACTs are a basic skill all characters posses and cost 0 TP.

Most skills scale from MG and usually scale from other additional stats. (AT,DF,HP...)

DEFEND - Defending acts as skipping the turn, Defending always grants 1 full TP point. (100 points)
Damage is also reduced by 15% when Defending.

ITEMS - Utilize an Item from the Inventory. Free cost.

TP:

Tension points are earned passively during battle, hitting perfect attacks, using items, grazing enemy bullets, defending, using certain skills and more all award TP.

However a portion of TP is also lost when taking damage, or by certain enemy actions. Larger portion of TP

is also lost whenever a Character gets downed.

TP is primarily used for SKILLS, as most Skills cost at least 1 TP, but can be as expensive as a full bar of TP. Certain ACTs can also cost TP to use. Alternatively TP is used for the Powerful Team Up Actions.

Each Character has their own TP Bar, segmented into 2-4 parts, once a portion gets filled up to the max its locked and cannot be lost by taking damage or being downed, etc. only by being used in an Action.

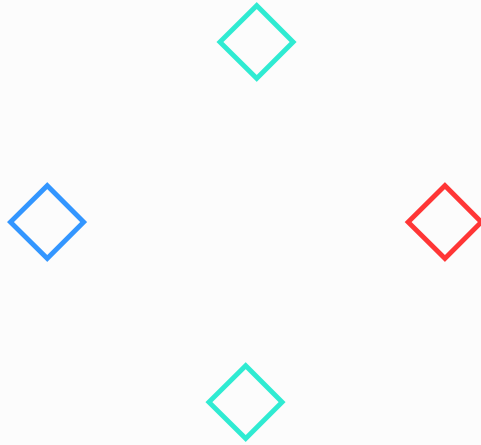

Team Up Actions:

Instead of using TP on skills, A Party Member with a full TP bar can initiate a Group FIGHT/SKILL Action with another Teammate(s). These are usually very powered up moves of that certain characters action. Team Up Actions cost a full TP bar to the initiating member, and 1 TP to any other member. All characters involved Actions are consumed during that Turn.

Formations:

The Party has 4 slots for members, with that come 4 positions in the Party Formation - 1 Frontline, 2

Midline and 1 Backline.

A Party Members position translates to how likely they are to be targeted by the enemy team. Midlines have a default value of 60%, while Frontlines have 80% and Backlines 40% chance of being Targeted.

If a Party Member in the Frontline position is downed, both The Midline characters are now considered Frontline, until a Active

Character is switched with the
downed Character in the Front.

STATs:

HP (Hit Points):

Health Points measure the current and maximum HP of a Character before being Downed. Max HP also increase the % of HP a character is revived with after recovering/being healed.

AT (Attack):

Measures the strength of any FIGHT actions, be it basic attacks or skills. Attack also increase the "Perfect" zones in the Fight minigames.

MG (Magic):

Magic boosts the effect/power of any Skills/Spells. Additionally increases TP gain by all means, also Decreases the TP penalties for taking damage.

DF (Defense):

Decreases the Damage taken from any source, Defense also increases the Max Overhealth a Character can have.

EN (Endurance):

Endurance increases INV frames after taking Damage and increases the % of HP Regenerated each turn

when Downed.

CLASSEs:

Each character fits into a certian Class based on their playstyle, granting them bonus stats.

Fighter - (Pure Damage Dealer, Main Dps)

+6 AT

+2 MG

Healer - (Heals/Buffs, Main Support)

+6 MG

+2 DF

+2 HP

Guardian - (Frontline Damage
Absorb/Sub Dps)

+6 DF

+2 AT

+5 HP

Caster - (Skill Abuser/Team Buffs/
Enemy Debuffs, Sub Support)

+4 MG

+4 EN

Cheerleader - (Hard to stay Dead,
Lower Stats but Versatile, Sub

Support/Dps)

+4 EN

+2 MG

+2 AT

+1 HP

SOULs:

1.

(Patience, Perseverance,
Enthusiasm)

A

2.

(Justice, Protectiveness, Bravery)

A

3.

(Mindfulness, Kindness, Insight)

A

4.

(Integrity, Loyalty, Will)

A

ROLEs:

DPS:

TANK:

HEALER:

SUPPORT:

Damage is reduced when below 50% Health.

Additionally when downed they heal at a rate of $\frac{1}{6}$ HP instead of $\frac{1}{8}$ HP per turn.

Has a $\frac{1}{5}$ chance to survive a killing hit with 1 HP. (5 Turn Cooldown)
